Institute**

PROFILE

Passionate web developer: I thrive on innovation, proactively solving challenges, and embracing diverse technologies—from HTML/CSS to JavaScript frameworks—with confidence and creativity. In addition to my technical expertise, I bring a passion for innovation and a proactive approach to problem-solving. Throughout my career, I have demonstrated the ability to adapt to new technologies and methodologies, allowing me to tackle complex challenges with confidence and creativity.

PROJECTS

Web Development

Acto Fit Fitness tracking web app

- Developed a an intuitive interface that seamlessly guides users through workout logging, goal setting, and progress tracking. Positive feedback poured in, and our user base grew by 30% within six months.
- Identified trends, personalized recommendations, and even helped users break plateaus. Engagement skyrocketed, with daily active users increasing by 40%.
- Inspired by behavioral psychology, I gamified fitness goals. Users earned badges, competed in challenges, and celebrated milestones.

Empower You Knowledge sharing platform

- Designed and launched a comprehensive platform that consolidates diverse educational resources into a single, user-friendly interface, resulting in a 40% reduction in time spent searching for study materials and a 25% increase in user satisfaction.
- Developed and implemented a feature allowing users to create and sell educational content, such as tutorials and courses, leading to the successful onboarding of over 500 educators and generating a 35% increase in platform revenue.
- Integrated advanced interactive tools, including quizzes, discussion forums, and live webinars, to enhance learning experiences and user engagement, which contributed to a 30% improvement in user learning outcomes and retention rates.

Full Stack Social Media App

- Instagram clone application with complete backend and fully mobile responsive with bottom bar.
- Implemented infinite scroll for exploring posts shared by others, ability to like and save posts shared by others.
- Implemented post page to display details of each post along with related posts.
- Added a profile page to manage liked and saved posts and also to edit posts.
- Implemented create post page to share posts with drag and drop features along with edit post to edit it later.
